Modern Physics Z James William

Since modern physics is hardly modern anymore, most of the important topics were developed 100 years ago, so it doesn't matter that the book is 11 years old. the best part is the lack of bright colors, useless notes on the side of the page, confusing layouts- all of which add unnecessary cost to already expensive textbooks.

Space-Time According to Einstein. The special theory of relativity, formulated by Albert Einstein in 1905, is based on the experimentally confirmed idea that the velocity of light is the same universal constant, $c = 3 \times 10^{10}$ cm./sec., for all observers who move uniformly in straight lines relative to each other.
