Philosophy For Architects

Philosophy for Architects is an engaging and easy-to-grasp introduction to philosophical questions of interest to students of architectural theory. Topics include Aristotle's theories of "visual imagination" and their relevance to digital design, the problem of optical correction as explored by Plato, Hegel's theory of zeitgeist, and Kant's examinations of space and aesthetics, among others.

Philosophy for Architects (Architecture Briefs) - Kindle ...

One reason that architectural ethics is central to philosophy of architecture is that architects' actions bear great influence over other people's moral lives. Architects design structures and environments for people, with concomitant effects on personal behavior, capacity to choose courses of

action, and ability to satisfy preferences, visit harm, generate benefit, or exercise rights.

Philosophy for Architects - Mitrovi, Branko ...

It is no surprise that Frank Lloyd Wright was one of the well-known and important architects of the 20th century. My interpretation for his philosophy is that deep consideration for human values should be present and thought as

basic or necessary architectural values. Anything else that fails to consider the human experience should not be valuable.

PDF Philosophy for Architects (Architecture Briefs)

But of course, no philosophy, discipline, or attitude, dictates what's the preferable application to create an exemplary piece of architecture. We see

this as a challenge by presenting this structural system, that when taken into a local context is more economical and effective than the current building trends.

Philosophy for Architects

Frank Lloyd Wright designed more than

1,000 buildings and his philosophy was that there should be harmony between humans and their natural environment, a concept he called organic architecture. One of his most iconic works was a project called Fallingwater , a house he designed in 1935 and which was partly built over a waterfall.
