metabolism. Despite its complexity, a general understanding of metabolism has been achieved because common solutions to the problem of biochemical design have been evolved. Thus, the types of substrates, cosubstrates, cofactors, fuels, and types of metabolic pathways used are common to most cells. This is the concept of biochemical unity.In

### PRINCIPLES OF METABOLIC CONTROL

Crash dieting, starving or fasting – eating too few kilojoules encourages the body to slow the metabolism to conserve energy. BMR can drop by up to 15 per cent and if lean muscle tissue is also lost, this further reduces BMR. Age – metabolism slows with age due to loss of muscle tissue, but also due to hormonal and neurological changes.
