Thereafter, keep the bracket in place again on the wall and fit it with the screws in the drilled holes. Make a hole in the wall or partition: Make a small hole of about 3 inches near the bracket across the wall or partition. Through this hole the refrigerant tubing connecting the indoor and the outdoor will pass.

### Installation of the Wall Mounted Indoor Unit of the Split ...

Low impact installation. Wall-mounted air conditioning units are simple to install and can be placed subtly, high up on a wall. This saves space and prevents a large appliance from blocking your view of outside. Plus, if you want to conserve a little energy, you will be able to open your window for some fresh outside air.

### Wall-Mounted Heating and Cooling Unit | Mitsubishi Electric

Wall AC units involve installation. In-wall air conditioners must be vented through an exterior wall, so make sure the inside of your wall is clear of any plumbing pipes or electrical wiring. Air conditioner wall units also need to be installed with a wall sleeve – either a through-the-wall sleeve or a slide-out chassis – because an exterior wall cannot support the weight of a unit by itself.

### Wall Air Conditioners - Air Conditioners - The Home Depot

To attach the air conditioner to the wall, simply align the female connections on the back of the unit with the male connections on the mounting plate and press firmly to secure the unit in place. Make sure the unit tilts backward 2-3 degrees so that water can flow out of the drain pipe. [4]
